SUMMARY

AI Product Engineer with 8+ years building production software, data pipelines and LLM products for e-commerce and marketplace workflows. Shipped an AI product that refreshes **800,000+ products daily** for a Swiss marketplace shipping 1M+ parcels per year. Combines hands-on Python, Laravel, React, SQL and multi-model LLM engineering with product ownership: 3 years leading a 6-member Agile team and a €500,000 digital transformation programme.

SKILLS

AI & LLM: Claude, OpenAI, Gemini and Grok APIs, prompt engineering, RAG, agents, MCP, structured outputs, multi-model routing, human review workflows, cost optimisation
Product: Product ownership, discovery and specs, UI/UX design, Agile / Scrum, Jira, stakeholder management, technical pre-sales
Backend: Python, Laravel, PHP, Node.js, REST APIs
Data: ETL, SQL, MySQL, PostgreSQL, XML / CSV / JSON feeds, data quality validation
Frontend: React, TypeScript, Vue.js, Flutter
DevOps: Docker, Linux, Nginx, CI/CD, Git
Spoken languages: Greek (native), English (C1), German (B1–B2)

EXPERIENCE

AI Product Engineer (Freelance) 01/2026 – 09/2026

DeinDeal AG, Swiss e-commerce marketplace (1M+ parcels per year), Zurich (remote)

- Shipped an LLM-driven catalogue product that refreshed **800,000+ products daily**, replacing spreadsheet workflows and cutting onboarding time for new partner sources.
- Acted as technical counterpart to partners from pre-sales scoping to go-live, turning commercial requirements into integration specs.
- Built it end-to-end (React front end, Laravel REST API): LLM translation and attribute enrichment with structured JSON outputs and multi-model routing, content-hash caching, automated output checks, and manual review and approval flows.
- Quantified a margin-eroding pricing rule and replaced it with a competitive-index model that systematised markup.

  Skills & tools: Laravel, React, REST APIs, LLM APIs (Claude, OpenAI, Gemini, Grok), prompt engineering, multi-model routing, XML / CSV / JSON feeds, FTP / SFTP, Channable, MySQL, Postman

Freelance Developer & AI Engineering Study 07/2025 – 12/2025

Self-employed, Greece

- Planned career break to study AI engineering in depth: LLM application design, retrieval-augmented generation (RAG), agentic systems and the Model Context Protocol (MCP).
- Delivered freelance web and data projects for clients in parallel.

  Skills & tools: Python, RAG, agentic systems, MCP, Claude API, Laravel, React

Director of Sustainable Tourism Development 05/2024 – 06/2025

KOAN S.A., Municipal Development Agency, Kos, Greece

- Led a €500,000 digital transformation programme across three municipalities (Kos, Astypalea, Nisyros), coordinating developers, content and advertising specialists through Agile delivery and Jira.
- Represented KOAN S.A. in an 8-member consortium that secured EU funding (ESPA 2021–2027) for a digital technologies and data management project.

Product Manager & App Engineer
02/2021 – 03/2024

Kalimera App (startup), Athens, Greece

- Owned the product lifecycle from concept to launch, leading a 6-member Agile team and translating user needs into backlog items.
- Designed the UI in Adobe XD and built the mobile and web application in Dart and Flutter.
- Scaled the platform to 80+ business profiles; 2nd Prize, CapsuleT Innovation Contest (2022) and selected for the CapsuleT Accelerator (2023).

Skills & tools: Product ownership, roadmap and backlog, Agile / Scrum, Jira, Adobe XD, Dart, Flutter

Digital Project Manager & Web Developer
05/2017 – 01/2021

Reach Web Agency, Kos, Greece

- Built and maintained web and e-commerce systems with automated XML feeds and API integrations, including PrestaShop platforms connected to Skroutz, Amazon and Google Merchant.
- Developed custom web applications with Laravel, Vue.js and React, leading projects from requirements to production rollout.

Skills & tools: PHP (Laravel), Vue.js, React, PrestaShop, WordPress, MySQL, REST APIs, XML product feeds, Git

IT Specialist
11/2016 – 05/2017

Hellenic Army, Brigade IT Command, Kos, Greece

- Designed an administrative database and wrote Python automation scripts while supporting Windows Server infrastructure.

SELECTED PROJECTS

Feed Intelligence (feed-intel.site)
Founder & Engineer

Translation and enrichment product

- Took a 6-stage translation and enrichment product (Upload, Analysis, AI Mapping, Scan, Translation, Export) from idea to launch in about two months.
- Translated a **220,000-SKU catalogue** at lower cost than the platform's native AI translation, routing content across Microsoft, Google, DeepL and Grok (xAI) in cost order with a content-hash Translation Memory.

Skills & tools: Laravel, React, queues and background workers, unit testing, CI/CD, Linux VPS, multi-provider routing

Client projects
Full-stack & e-commerce

Freelance, Greece

- Archon Yachting (archonyachting.com): yacht charter platform with booking system and online payments.
- Arogi Kos, Arangia, La Islakos: brand-led websites and a small online store, built with AI-assisted development.

Skills & tools: Laravel, Vue.js, Statamic CMS, React, PrestaShop, payment integration, Claude

EDUCATION

MEng, Electrical & Computer Engineering — Technical University of Crete
2009 – 2016

Thesis: Smart Questionnaire Generator for Restaurant Customers (Vue.js, Laravel).
