Petros Pikionis

AI Software Engineer | onehublabs.com

Building production LLM applications end-to-end: model integration, backend services, data pipelines and React interfaces.

petrospikionis@gmail.com | +30 694 803 4055 | linkedin.com/in/petros-platon-pikionis-4045a782 | feedgenix.com

SUMMARY

AI Software Engineer with 9+ years building production software, data pipelines and LLM systems for e-commerce and marketplace workflows. Built an LLM-driven catalogue system that refreshes **800,000+ products daily** for a Swiss marketplace shipping 1M+ parcels per year. Experienced in Python, Laravel, React, SQL, ETL and multi-model routing (Claude, OpenAI, Gemini, Grok), working spec-first and test-driven with Claude Code.

SKILLS

AI & LLM: Claude, OpenAI, Gemini and Grok APIs, prompt engineering, RAG, agents, MCP, structured outputs, multi-model routing, output validation, cost optimisation
Backend: Python, Laravel, PHP, Node.js, REST APIs, queues and background workers
Data: ETL, SQL, MySQL, PostgreSQL, XML / CSV / JSON feeds, data quality validation, normalisation
Frontend: React, TypeScript, Vue.js, Tailwind CSS
Testing: Unit testing, React Testing Library, Vue Test Utils, API testing (Postman)
DevOps & practice: Docker, Linux, Nginx, CI/CD, Git, Claude Code
Spoken languages: Greek (native), English (C1), German (B1–B2)

EXPERIENCE

AI Software Engineer (Freelance) 01/2026 – 09/2026

DeinDeal AG, Swiss e-commerce marketplace (1M+ parcels per year), Zurich (remote)

- Built an LLM-driven catalogue processing system that refreshed **800,000+ products daily**, replacing spreadsheet workflows and cutting onboarding time for new partner sources.
- Designed the LLM layer: structured JSON outputs, prompt patterns per field type and multi-model routing (low-cost models for bulk work, reasoning models for judgement-heavy content).
- Engineered for reliability and cost: content-hash caching that eliminated repeat API calls, rule-based pre-filtering, automated output checks, and manual review and approval flows.
- Built the surrounding data workflow: XML / CSV / JSON ingestion over FTP / SFTP, transformation logic for pricing, margin, stock and shipping, a Laravel REST API and a React front end.

  Skills & tools: Laravel, React, REST APIs, LLM APIs (Claude, OpenAI, Gemini, Grok), prompt engineering, multi-model routing, content-hash caching, XML / CSV / JSON feeds, FTP / SFTP, Channable, MySQL, Git

Freelance Developer & AI Engineering Study 07/2025 – 12/2025

Self-employed, Greece

- Planned career break to study AI engineering in depth: LLM application design, retrieval-augmented generation (RAG), agentic systems and the Model Context Protocol (MCP).
- Delivered freelance web and data projects for clients in parallel.

  Skills & tools: Python, RAG, agentic systems, MCP, Claude API, Laravel, React

Director of Sustainable Tourism Development 05/2024 – 06/2025

KOAN S.A., Municipal Development Agency, Kos, Greece

- Led a €500,000 digital transformation programme across three municipalities (Kos, Astypalea, Nisyros), coordinating developers and other specialists through Agile delivery and Jira.

Product Manager & App Engineer 02/2021 – 03/2024

Kalimera App (startup), Athens, Greece

- Built the mobile and web application in Dart and Flutter and designed the UI in Adobe XD.
- Led a 6-member Agile team from concept to launch.
- Launched the MVP in a local market: 80 sales in the first year. Won 2nd place at CapsuleT's Idea Platform (2022) and took part in the CapsuleT Innovation Contest, a 6-month startup acceleration programme (2023).

  Skills & tools: Dart, Flutter (mobile & web), Adobe XD, Agile / Scrum, Jira

Web Developer & Digital Project Manager — 05/2017 – 01/2021

Reach Web Agency, Kos, Greece

- Built and maintained web and e-commerce systems with automated XML feeds and API integrations, including PrestaShop platforms connected to Skroutz, Amazon and Google Merchant.
- Developed custom web applications with Laravel, Vue.js and React, leading projects from requirements to production rollout.

Skills & tools: PHP (Laravel), Vue.js, React, PrestaShop, WordPress, MySQL, REST APIs, XML product feeds, Git

IT Specialist — 11/2016 – 05/2017

Hellenic Army, Brigade IT Command, Kos, Greece

- Designed an administrative database and wrote Python automation scripts while supporting Windows Server infrastructure.

SELECTED PROJECTS

FeedGenix (feedgenix.com) — Founder & Engineer

AI SaaS for product feeds, in private beta

- Connect a product feed, review the AI's field mapping, translate it into the languages you sell in and publish a feed URL for each.
- First version, Feed Intelligence: took a 6-stage translation and enrichment product (Upload, Analysis, AI Mapping, Scan, Translation, Export) from idea to launch in about two months.
- Translated a **220,000-SKU catalogue** at lower cost than the platform's native AI translation by routing content across Microsoft, Google, DeepL and Grok (xAI) in cost order.

Skills & tools: Laravel, React, queues and background workers, unit testing, CI/CD, Linux VPS, multi-provider routing, medallion architecture

Client projects — Full-stack & e-commerce

Freelance, Greece

- Archon Yachting (archonyachting.com): yacht charter platform with booking system and online payments.
- Arogi Kos, Arangia, La Islakos: brand-led websites and a small online store, built with AI-assisted development.

Skills & tools: Laravel, Vue.js, Statamic CMS, React, PrestaShop, payment integration, Claude

EDUCATION

MEng, Electrical & Computer Engineering — Technical University of Crete — 2009 – 2016

Thesis: Smart Questionnaire Generator for Restaurant Customers (Vue.js, Laravel).

CERTIFICATIONS

Mastering Claude AI: Prompting, APIs, RAG and MCP (Specialization, Coursera) · AWS Generative AI Developer (Advanced Professional Certificate, AWS / Coursera) · React, Advanced React, Reusable Components, Tailwind CSS, TypeScript (Scrimba / Coursera) · API Testing with Postman · Agile Software Development · Introduction to Project Management (IBM) (Coursera)
